Uninterrupted
material supply:
Rear-loading of
containers

**More flexible and cost effective
than an ALU workstation**

Conversion without inconvenient assembly and disassembly

The benefits

- Optimisation of assembly/logistics interface
- Flexible adjustment of the levels/rails in width, height and angle
- Process-optimised material supply
- Materials delivered to best-point grip spaces
- Ideal for larger unit quantities

Electrical height
adjustment from
722 - 1,116 mm

Material supply system **MULTIFLOW**

The **MULTIFLOW** material supply system is synonymous with the realisation of process-optimised serial assembly. The height, depth and angle-adjustable material supply system enables an optimised grip space to be configured for every worker, in terms of the best-point character. Flexibly adjustable rails allow different container sizes to be integrated at any time. Optional, electric-powered height adjustment

allows for perfect workstation setting in no time, ideal for frequent staff changes, e.g. with shift operations. Another huge benefit is that most of the components can be adjusted without tools to save valuable time in the reconfiguration process. The **MULTIFLOW** system helps ensure a process-optimised supply of materials at all times.

Material supply system MULTIFLOW

Ergonomically and process-optimised material supply. Just a few minutes needed to reconfigure for changes in processes or personnel.

KRIEG | **WORKFLEX**
Healthy workplaces for more profitability

Adjustable storage console with flexible shelf width adjustment.
With dividers for flexible adjustment of the shelf width – ideal for containers of different sizes. Variably adjustable in width, height and angle.

Material slides
The front edge of the rail is equipped with small rollers, which make it particularly easy to remove the KLT containers. The width, height and inclination can be adjusted individually. The containers are equipped with practical recessed handles that can be hooked directly into KLT boxes.

Material slides with roller strips
Width, height and angle can be adjusted as required. The roller strips ensure a smooth flow of material.

Perforated tool plate
Tool-free plug-in attachment of accessories such as

- Document tray
- Tool holder
- Bottle or bag holders
- Monitor holder
- Parcel tape dispenser

Adjustable screen mount

Empty containers returns

Control panel for electric height adjustment

With memory function for 4 pre-set working heights and digital display screen for an exact height.

Flexible material supply system

The modular system design allows the **MULTIFLOW** material supply system to be custom configured. Depending on the size of the small load/grab containers, different material supply concepts can be used individually – for the optimal solution in every application.

Height, depth and angle positioning

Adjustable storage consoles, material slides and roller strips enable customisable material feed. The containers' width, height, and angle can be flexibly adjusted so that, after each rear-side filling, they slide into the assembly area and stop within the worker's ergonomic bestpoint reach.

Empty container returns

The empty container return chute mounted under the table means the worker can effortlessly deposit the empty container without wasting time. The empty containers can then be retrieved from the rear by the logistics.

The benefits at a glance

- Process-optimised material supply system
- Material delivery arrangement is height, depth and angle-adjustable
- Can be adjusted in no time to process changes
- Various options for material feed, such as material slides, adjustable storage consoles or roller strips
- With perforated tool plate on the side for accessory components such as document trays or tool holders
- All components tool-less adjustable
- Professional series production possible

Your advantages over aluminum

- Cost-effective
- Accessory components tool-less adjustable
- More flexibility through simple conversion
- Individual color concept possible through high-quality powder coating

Technical specifications:

Width:	approx. 1,500 mm
Depth:	approx. 1,500 mm
Total height:	approx. 2,000 + 400 mm Height adjustment
Electrical height adjustment:	722 - 1,116 mm
Load capacity:	350 - 600 kg depending on height adjustment

excl. tare and attachment weight and only with even weight distribution.

Tool-less push-fit accessory components

Time-efficient assembly and reconfiguration with integrated antidrop system

Fast and individual positioning all necessary work equipment is used by Ensuring a health-friendly Posture during the work process.

ASSIST SYSTEMS - Perfectly combined

Workflows with the WORKFLEX® web app

Fully-digital portal for creating, managing and implementing work instructions

Work instructions can be generated, managed and implemented with the aid of the web app. Work instructions can be fully customised, and can be modified, supplemented and accessed at any time. The worker is guided step-by-step through the process, aided by text information, images and videos. The simple and user-friendly interface means that even people with no programming experience can enter new workflows.

1 Summary of functions

2 Creation of work instruction

3 Work instruction display

Functions

-  Standardising the creation, management and implementation of work instructions
-  Simple integration of a documentation function
-  Capture of data across the workflow
-  Analysis of processes for greater optimisation potential
-  Hardware available for enhanced support

The benefits

- No programming experience necessary
- Simple generation of work instructions
- Less time needed to train new employees
- Increase in productivity, reduction of error rates
- Reduced time and effort for work preparation
- Support through media data such as images and videos

WE ARE MANUFACTURER

WHY NOT BENEFIT FROM OUR SPECIALIST KNOWLEDGE?

-  LARGE PRODUCTION SELECTION
-  MADE IN GERMANY
-  10 YEAR MANUFACTURER'S WARRANTY
-  INDIVIDUAL CUSTOM-MADE SOLUTIONS

YOUR BENEFITS

69 YEARS' EXPERIENCE

Benefit from our expertise as a manufacturer

PROJECT IMPLEMENTATION

From the initial drawing to the turnkey assembly

DESIGNING CUSTOMISED SOLUTIONS

- On-site analysis and professional advice from IGR-certified ergonomics coaches
- CAD visualisation and prototype construction
- From the initial drawing to the turnkey assembly

IN-HOUSE DESIGN AND DEVELOPMENT

- Over 69 years of experience
- Cost-optimised production options
- High product quality and functionality at a fair price

IN-HOUSE-TRAINED SPECIALIST FITTERS

- High-quality, precise assembly
- Fast and reliable
- On-schedule and tailored to customer's needs

Additional services

10 year warranty

10 colours, one price

Free delivery!

in workplace organisation

PLAN WITH THE ERGONOMICS PROFESSIONALS

- Expert advice from IGR-certified ergonomics coaches
- Best-point grip spaces - perfectly positioned for your process
- Free on-site analysis and professional advice

Certified Ergonomic Coaches

Our employees have been certified as ergonomics coaches by the IGR (German Institute for Health and Ergonomics). Our ergonomics coaches will devise the perfect ergonomic concept to satisfy every aspect of your workstation needs.

IGR certification as mark of our self-assurance

Height-adjustable work tables are increasingly in demand for creating an ergonomic and highly productive work environment. We arranged for our Ergo E and Ergo K table systems to be IGR-certified in order to fulfil our customers' quality expectations.

INNOVATION AWARD FOR ERGONOMICS 2025

All our efforts have paid dividends!

We have been awarded with the "Innovation Award for Ergonomics 2025" by the German Institute for Health and Ergonomics (IGR) for special achievements in the field of ergonomics. We are pleased to have been awarded again after the "Innovation Award for Ergonomics 2023".

Already awarded in 2023
